SUMMARY:

Software Engineering graduate student at Arizona State University with experience in full-stack development, machine learning projects, and data analytics systems. Proficient in Python, Java, React, Node.js, and cloud platforms.

EDUCATION:

M.S Computer Software Engineering

Expected May 2027

Arizona State University, Tempe, AZ

B.E Computer Science Engineering

May 2025

Sri Shakthi Institute of Engineering and Technology

TECHNICAL SKILLS:

Programming Languages: Java, Python, JavaScript, C/C++, C#

Frontend: React.js, HTML5, CSS3, Bootstrap, Angular

Backend: Node.js, Express.js, REST APIs

Databases: SQL, MongoDB, Firebase

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker

Big Data: PySpark, Data Processing, Data Visualization

Developer Tools: Git, GitHub

Operating Systems: Linux/Unix, Windows, macOS

PATENTS AND RESEARCH PAPERS:

- Blockchain-based approaches for monitoring fraud detection in the Digital Payment Industry 4.0.
 - Stock Market Analytics using Machine Learning.
 - Skin Burn Detection Bot.
 - Analysis of the New Paradigm of College Education through Analogy-Based Artificial Intelligence Pedagogy.
 - AI-Enabled Learning Engagement Model For Synchronizing Student Activities And Faculty Involvement In Higher Education
 - Exploring the Fundamentals of Human-Computer Communication Advancements and Implications in HCI - International Journal of Engineering and Techniques, Vol. 9, Issue 3 - 2023.
 - A Review on Stream Data Analytics Using PySpark and Google Colab - Karpagam JCS, Volume 18, Issue 4.
 - Combining AI with Machine Learning to Improve Decision-Making in New Business Technologies.
 - Hybrid Random Forest-Deep Neural Network Approach for Intelligent Facial Emotion Recognition in Smart Applications - In progress for IEEE 2026
-

PROFESSIONAL EXPERIENCE:

Metographics, IND: Junior Software Intern

April 2024 - June 2024

- Contributed to IoT-based smart solutions using MERN stack technologies.
 - Designed a data analysis database to support company decision-making processes.
 - Collaborated with engineers to build scalable backend systems and improve data workflows.
-

RELEVANT PROJECT:

Spyware & Stalkerware Detection App, Academic Project.

Summer 2025

- Developed a security app that identifies hidden spyware and stalkerware on devices. Created a multipage Streamlit interface with detailed proof-based reporting

Real-Time Stock Market Analytics Dashboard, Academic Project

Fall 2024

- Built an interactive dashboard for analyzing live stock market data using streamline. Implemented real-time visualization of performance trends using Python and data APIs

HERa - Women's Safety Application, Hackathon

Fall 2024

- Led a national-level team to design HERa, a mobile app for women's safety. Coordinated development and presented the solution at the Grand Finale of SIH 2024 Integrated location tracking, emergency alerts, and AI-driven threat detection.
-

EXTRACURRICULAR EXPERIENCE:

- Winner (GlobeWial) - Wics X Opportunity Hack 2026
- Team Lead - Spade Z, Smart India Hackathon Grand Finale (2021 & 2023 & 2024)
- Participant - MSME Women 3.0 Hackathon (2023)
- Participant - IEEE Returning Mothers Hackathon (2023)
